Art Unit: 1755

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to metal compounds covalently bonded to supports, classified in class 502, subclass various depending on the nature of the metal compound.
- II. Claims 13-22, drawn to various catalytic processes performed using the compounds of group I, classified in class various depending on the identity of the compound made, subclass various depending on the identity of the compound made.

2. The inventions are independent or distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h) and *Studiengesellschaft Kohle mbH v. Northern Petrochemical Co.*, 228 USPQ 837. In the instant case the process for using the product as claimed can be practiced with another materially different product, such as a homogeneous catalyst.

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Claims 13-22 are generic to the following disclosed patentably distinct species: compounds which have been asymmetrically hydrogenated across C-C double bonds, whether they be used as agrochemicals, pharmaceuticals, or optical resolution agents, the species being alpha or beta ketocarboxyesters or simple olefins. The species are independent or distinct

Art Unit: 1755

because the products made from the different starting materials are chemically distinct.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of product, i.e. a specific compound made using the catalyst of group I, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. A telephone call was made to Diderico van Eyl, Esq., on 5/19/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Pasterczyk whose telephone number is 571-272-1375. The examiner can normally be reached on M-F from 9 to 5:30.
